Intelligent workplace efficiency

Our Vision

To lead our customers towards improved workplace efficiency, enabled and assisted by the latest technology and state-of-the-art products, allowing employees and businesses to deliver optimal performance.

Technical Support

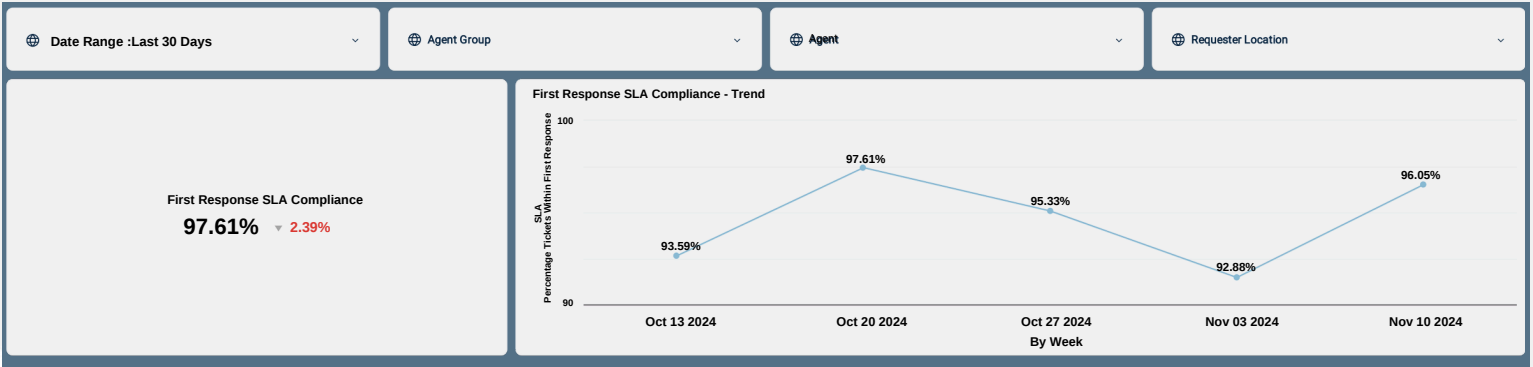

As a leading distributor and supplier, Page Automation has full technical accreditation from all its OEM manufacturers.

All technicians undergo accredited technical training and must meet the manufacturers repair standards before they are authorized to maintain any equipment. In addition, on-going training is provided by the manufactures to keep our technicians up to date.

SERVICE SUPPORT

The company completes more than 4000 technical calls per month and has adopted an omnichannel Customer Service Suite incorporating AI capabilities, allowing our customers to place service calls via a variety of channels. The powerful monitoring capabilities transforms the customer experience and real time Service Level Agreement reporting enhances the service delivery to our customers.

OUR PRODUCTS

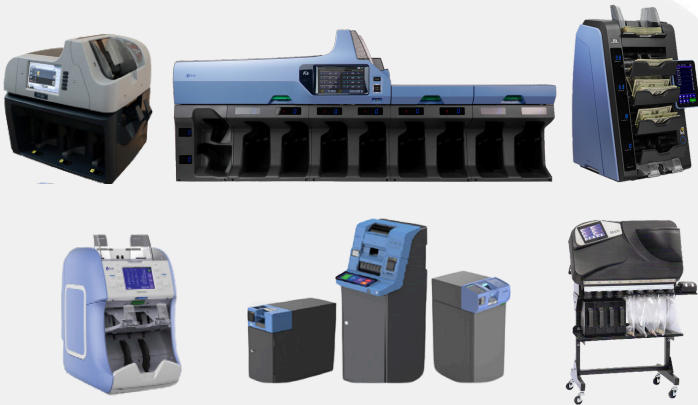

All the products supplied by Page Automation can be covered by a monthly maintenance contract or extended warranty, customized to meet your business requirements. These products are carefully selected for their worldwide reputations that support the company’s goal of providing quality products at cost effective rates, whilst maintaining high service levels at all times.

Office Automation

A national distributor and the largest supplier in South Africa for the full and extensive range of Kyocera Document Solutions, multi functionals, laser printers, software solutions and consumables.

Money Handling

With the world’s best banknote technology, we provide a comprehensive range of cash handling products, from leading edge self-service solutions to comprehensive banknote and coin counting equipment.

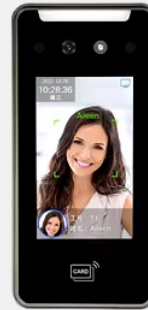

Our product set enables Page Automation to provide customers with one total integrated solution.

Digitization

Our digitization solutions allow our customers to migrate from paper based to digital work environments through the use of digital technologies by creating new or modify existing business processes, culture and customer experiences, streamlining business operations and improving business process efficiencies.
